

Conference Call Summary

**May 12, 2009 Conference Call
11:30-12:30 Central**

The topics discussed under each of the agenda items are summarized below.

Updated draft of literature review available for final comments:

The revisions to the literature review were discussed. Call participants identified additional reports and reports that, while not currently available, would likely become available during the lifetime of the project. These reports will be incorporated into the Task 1 report as they emerge, so the report will continue to be updated throughout the project.

Discussion of revised sampling plan including comparisons with EPA protocol:

The revised sampling plan for compressors at gas processing sites is posted on the web site.

Update on sampling and request for sampling sites: Dave Allen and Jim Thomas

The project team will begin equipment shake-down this week at a site in Texas. Meanwhile the project team invites facilities that would be willing to grant access to their sites for measurements to contact the project team. An information form for prospective sites is being prepared and Jim Thomas of The University of Texas at Austin, will be the point of contact. Jim can be reached by email at jwinthomas@aol.com or by phone at (254) 760-9798. It is anticipated that sampling will begin as soon as site access agreements can be established, likely in late July or early August.

Questions and agenda items for next call: Dave Allen
